EVENT IDEA

EVENT NAME: AFLATOON

DETAILS: In this event , we will be giving different languages as category (like C++ , C , JAVA , PYTHON) to the students to choose from.

Students have choice to choose one preferable language and after that they are supposed to give one of the best program they have done in that particular language (that may be any thing like game or any big program on real world problem).

Their submissions will be judged on the basis of category only like C++ Programs will be judged separately with rest of the C++ programs only, same for all the categories.

This event may help freshers to more involve in events as they are new here and might feel less confident.

This will also help them memorize their previous studied programs and projects.

VISION: To let freshers feel a little comfortable in this new environment by having a event which just ask for what they have studied before and have the liberty to choose one language they are comfortable in.

This will definitely increase the confidents of the freshers.

VENUE: In ORION.

BUDGET: There is no such heavy budget, just for the prizes we need some money. (Otherwise the laptops will be brought by the students itself).

PEOPLE NEEDED: 5-6 people will be needed to monitor everything and host the event also.

PUBLICITY: Photos of the event will be posted on the PCC page(also on Instagram and NITT Website).

For taking photos team members will be enough with good photography skills.
